## LANGUAGE

- Thai (Native)
- English (Intermediate)

## EDUCATION

**King Mongkut's Institute of  
TechnologyLadkrabang Prince of  
Chumphon Campus**

Bachelor of Business Management  
2021-Present

## INTERSHIP

- Web Developer
- Software Developer
- UX/UI

## EXPERIENCE

### Automatic trashbin

It's a smart trash can that automatically opens and closes using a sensor or by command from the dashboard. The LCD screen displays the bin's capacity as a percentage. When it's full, it shows 'MAX' on the screen and sends a notification to LINE automatically.

### TWITTY FOLLOW SYSTEM

Twitty is a social media platform with a user interface reminiscent of Twitter. users can follow accounts, express approval by clicking the 'LIKE' button, and peruse the posts of those they follow for a more personalized experience.

### Airport Database

I developed a comprehensive airport database system. It's designed to store a wide range of information crucial for airport operations. This database setup allows for efficient management of airport resources and provides essential support for customer services.

## SKILL

- C/C++
- JavaScript
- Python
- MySQL
- HTML
- Figma
- CSS
- GitHub

## SOFT SKILL

- Adaptability
- Life-Long Learning
- Collaboration
- Critical Thinking

Period of time

22 April - 21 June 2024
